

Unify Your Bank's Operations from Core-to-Customer for Next-Level Customer Satisfaction.

Savana is a core-agnostic digital delivery platform that unifies and orchestrates your bank's channels, products, and processes to enable truly frictionless interactions between your bank and its customers.

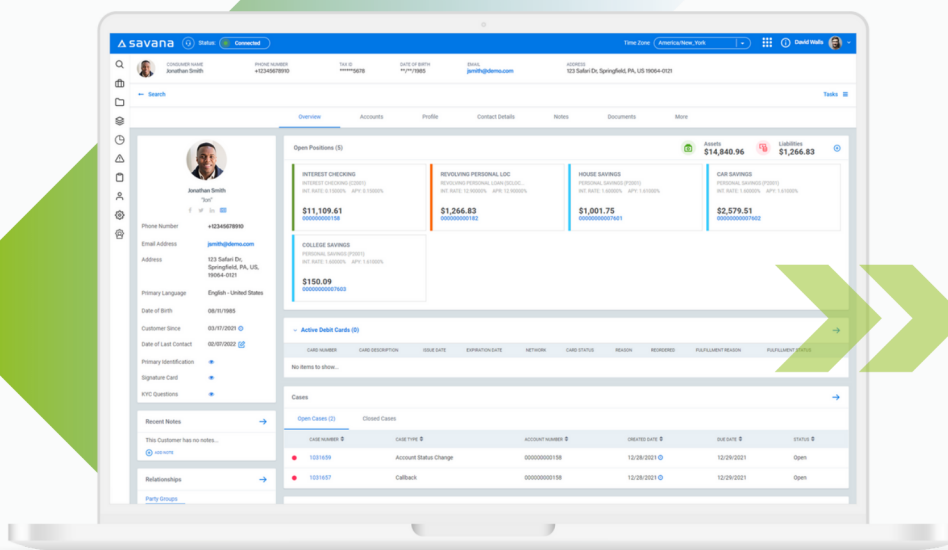

Enable Your Customers

Consolidate Your Processes

Achieve Peak Operational Efficiency

One Platform, One Experience for Your Bank's Operations and Digital Channels.

Optimize your back-office operations with a unified banker experience for maximum efficiency. Your digital self-service customer channels will access the same centralized processes via APIs for unparalleled channel consistency.

Self-Service and Assisted Channels, United.

It starts with a single, streamlined experience for your bankers – from here, you can go anywhere. Key components of the platform include:

Savana Banker Experience

Savana's Banker Experience is a single pane of glass that enables back-end teams to service customers seamlessly across all bank assisted channels and all retail and commercial products. This is your control center for all process workflows, customer communications, operational reporting, and more.

Savana Banking APIs

Savana's Banking APIs are a centralized process API library gives you control of your bank's processes across every channel. This centralized API library extends the robust servicing functionality of the back-office experience into your bank's digital customer self-service channels.

Savana Customer Experience

Savana's Customer Experience is a launchpad for getting to market faster with a bespoke online/mobile banking and account opening experience. Differentiate your institution and design the digital experience your customers deserve.

Savana is the Way Your Bank Should Work.

The Savana Difference:

- Realtime Communication Between the Core(s) and all Assisted and Self-Service Channels
- Core and Product Agnostic
- Best-of-Breed Fintech Integrations
- Model Bank Pre-Configuration
- API-First Design

Key Benefits of the Platform:

- Operational Excellence
- Consistent Customer Experiences
- Ownership of Processes and Logic
- Customer Experience Speed-to-Launch
- De-Risk Core Conversion
- Regulatory Compliance Oversight
