

The Way Your Credit Union Should Work.

Meet Your Members Where They Are.

With Savana, your self-service and assisted channels become one.

Unify disjointed experiences and fragmented workflows—into a single, connected platform that ensures a smooth experience for both members and staff. Meet your members wherever they are, with one seamless journey across every channel.

Your Self-Service Channels

A frictionless, self-service experience that gives your members more control while enabling your institution to extend and scale its brand. A single code base ensures consistency across online, mobile, and assisted hybrid experiences.

Your Assisted Channels

A single staff experience to manage the entire member relationship while eliminating swivel chair. Bring your departments together with automated workflows and built-in guardrails to deliver proactive, consultative service at every step.

One Platform. One Experience.

Savana's Customer Experience

- Mobile Banking
- Online Banking
- Mobile Account Opening
- Online Account Opening

Savana's Banker Experience

- Assisted Account Opening
- Branch
- Contact Center
- Back Office

Choose Consultation Over Transaction.

Break Down the Barriers

Unify your cores, CRM, BPM, third-party tools, and more with one cohesive platform – creating seamless connectivity across your systems and departments to foster lasting consultative relationships over disjointed impersonal transactions.

Empower Your Staff

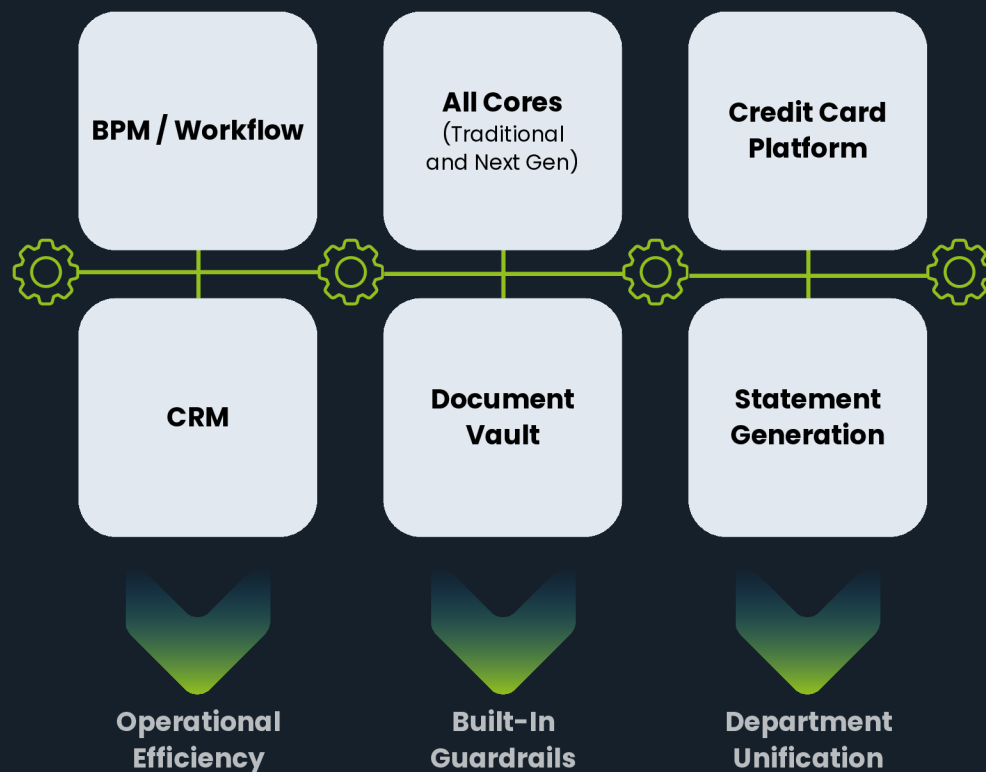

Manage all member accounts, cards, communications, and processes through a single, comprehensive banker experience with 360° customer relationship views.

Unlock Operational Excellence

Automate and orchestrate processes and workflows across your institution to drive efficiency gains while providing built-in guardrails to save time, reduce errors, and ensure seamless operations.

Modernize Now

Launch or transform quickly with over 140 preconfigured, configurable processes out-of-the-box.

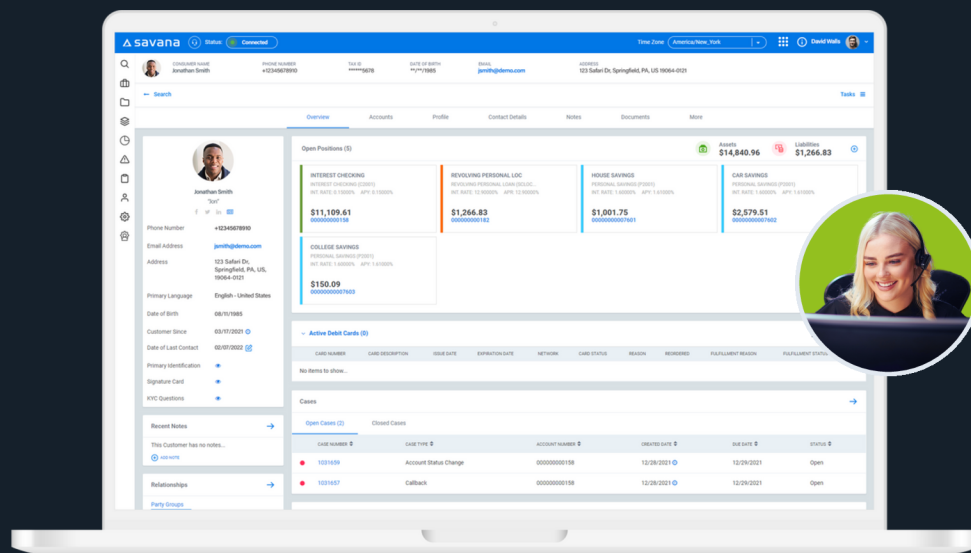

Unified Systems

Behind the scenes, Savana unifies your credit union's disparate systems to bring everything together - including cores, CRM, BPM, third-party tools, and more.

One Banker Experience

This culminates into one 360° desktop experience to manage member relationships across all channels, products, and cores.

140+ preconfigured (configurable) processes drive every scenario from address changes to multi-party assisted account opening tasks.

Modern, Secure, Next-Gen Digital.

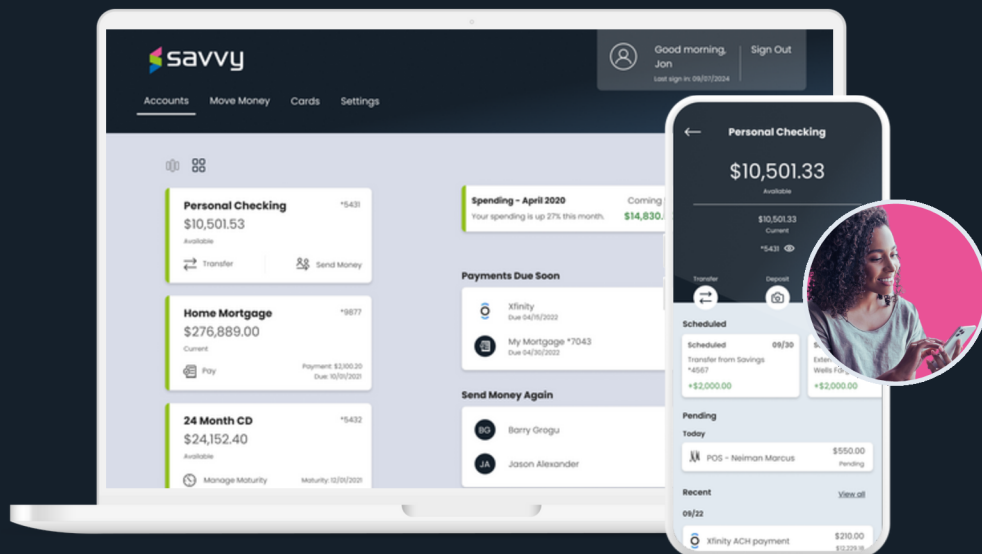

Single Code Base You Control: Ensure feature parity with a single code base across all self-service experiences including online and mobile banking and account opening.

Your Brand, Your Experience: Customize branding, functionality, and member journeys, with access to the platform's source code.

Single and Multi-Brand Support: Easily launch multiple brands while maintaining unified workflows and operational excellence.

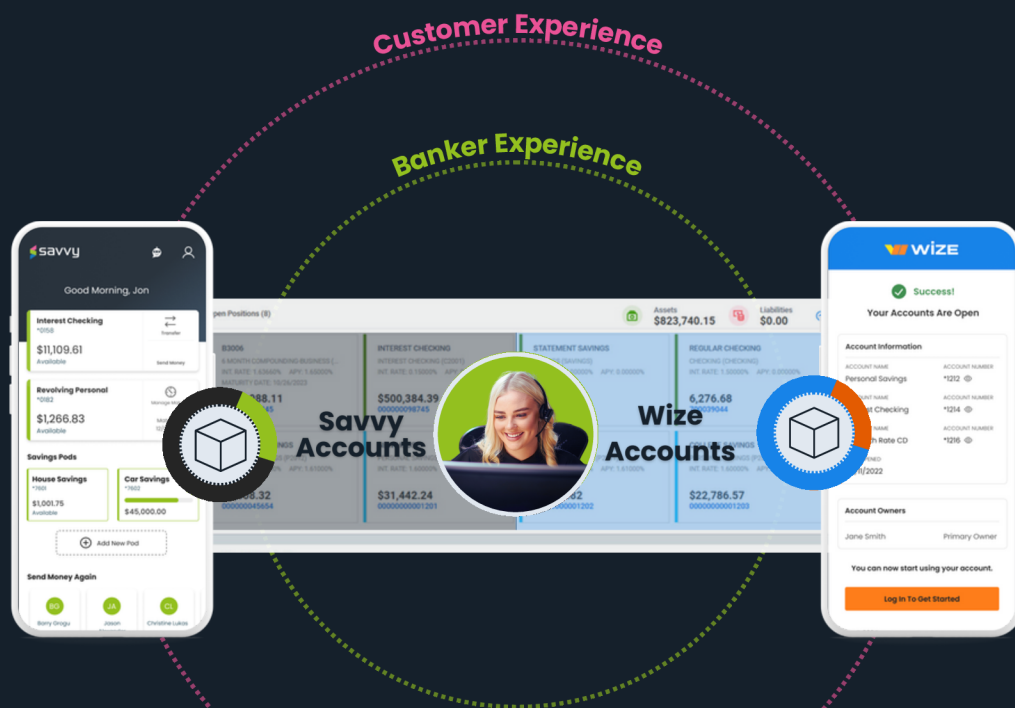

Fluid Transitions to Assisted: Bridge the gaps that exist between self-service and assisted channels, especially for complex scenarios like multi-party, multi-channel account opening.

One and Done Authentication: Your customers log in once during onboarding and gain instant access to online banking.

Empower Your Members

Extend the power of Savana's credit union assisted workflows directly into the hands of your members for online and mobile banking and account opening - enabling them to do more with their self-service experience.

Did We Say One Experience?

Customer Experience and Banker Experience are deeply connected via powerful APIs and ready to scale with your business. Your workflows, processes, and banker view remains unified through whatever comes. Launch that new brand - your operations are silo free with Savana.

Break Down the Barriers to a Better Experience for Your Members and Your Staff.

Unify all cores, products, and channels through one solution.

Own your business processes and channel experiences holistically.

Gain complete control of your brand, functionality, and journey.

Manage all experiences from one platform with a single code base.
